

IQVIEW

IQView

A Fresh Perspective on Visualization

IQView is a powerful and user-friendly presentation software that supports 4K resolution display, compatible with common camera devices, and offers features to display, record, edit, and enhance video feed from the camera and more.

Multi-Camera

Annotation

Hand Gesture Support

20x HD Zoom

Side-by-Side

OCR+QR Code

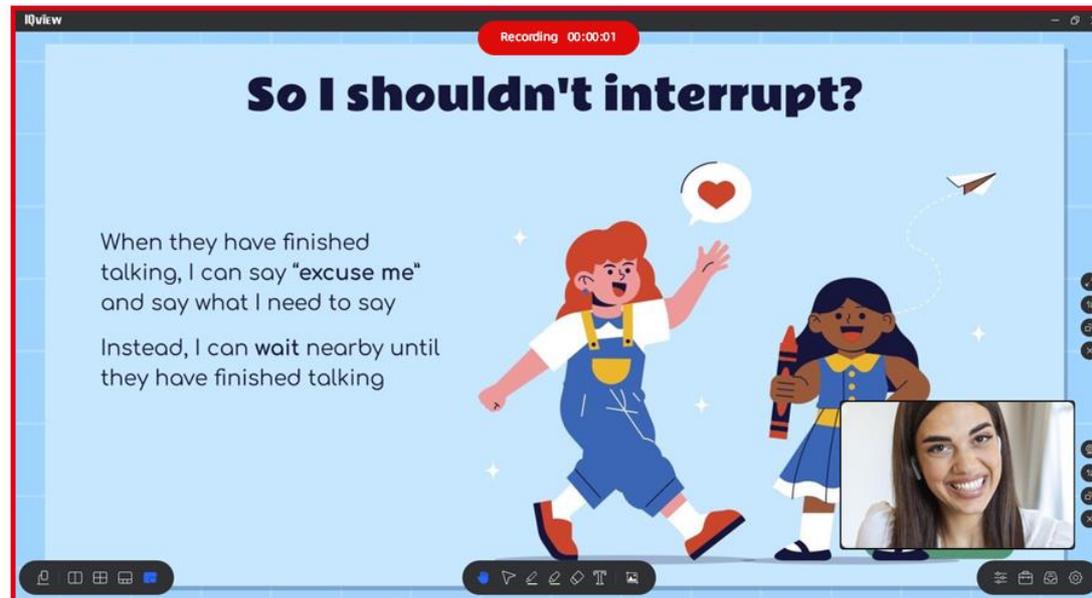

Cloud Storage

Multi-Platform

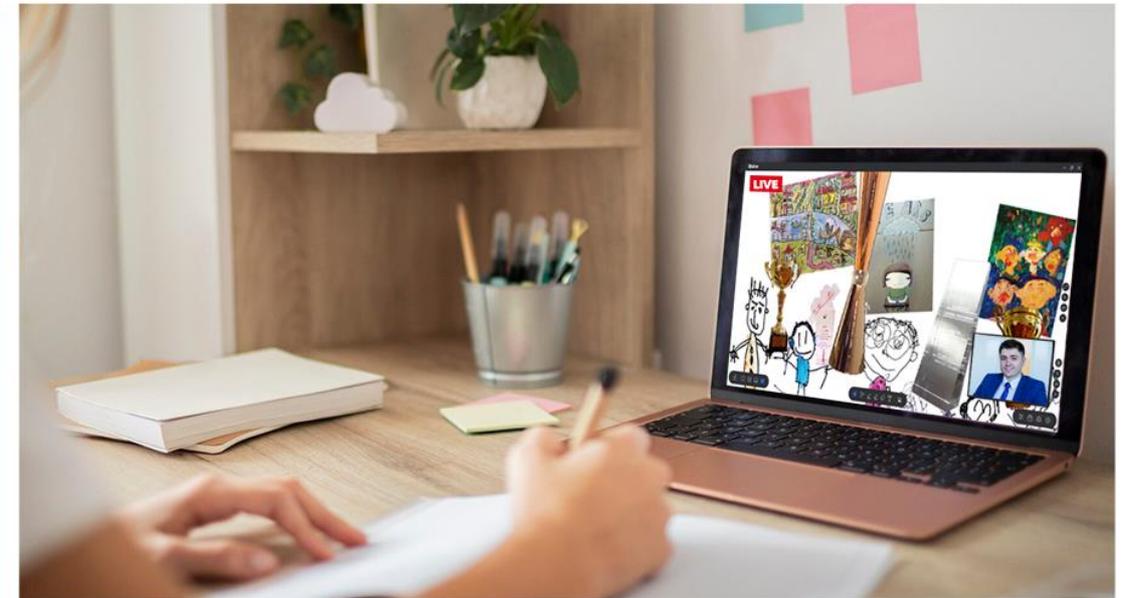

Dual Camera Presentation

It allows you to display your content in the main window while showing yourself speaking in a pinned overlay window, making your presentations more engaging and interactive.

Enhanced Micro-Lessons

Allow students to focus on the content while experiencing the teacher's active participation.

Interactive Online Teaching

Utilize Picture-in-Picture for interactive online teaching, encouraging active student participation and direct engagement with the instructor.

Secondary economic sector activities involve the processing of those raw materials through manufacturing, which has been the mainstay of economic growth for most developed countries, as well as construction.

Tertiary economic sector activities are those that produce services, not physical products, such as wholesale and retail sales, personal services, and business services.

Quaternary economic sector activities are those that deal with information collecting and processing, as well as management and decision-making.

The tertiary and quaternary economic sectors are often thought of together as the service sector. Only primary and secondary activities produce actual physical products, and manufacturing traditionally earns the highest value-added profits. Tertiary activities are selective in gaining national wealth. For example, service activities such as tourism can bring in national wealth if the visitors are from outside the country. Tourism within a country can also influence economic conditions by increasing the amount of consumer spending.

Figure 1.33 The three main sectors of production

E. National Debt

Countries with few opportunities to gain money to provide services for their people have high national debt. National income can be low, especially if the population at the top of the socioeconomic hierarchy dominates the policies of their countries. Wealthy nations have high national wealth, while at the same time their governments have high national debt. To pay for public services, the government might need to borrow money from other countries or issue bonds.

greater economic security for themselves and their families. The haves and have-nots are general categories of economic status and not necessarily cultural values.

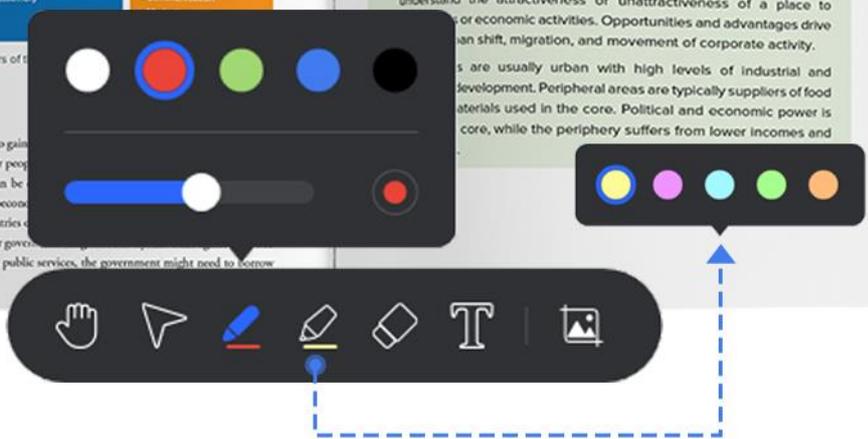

Countries in stage 4 or 5 of the DTM are often attractive places for those seeking greater economic opportunities or advantages. Populations in these stages generally have fewer children, so the demand for entry-level workers is often higher. Immigrants with few skills take the entry-level jobs to enter the economic workforce. An established country with a long-standing history and culture does not always welcome an influx of new immigrants. The arrival of an immigrant labor pool often includes individuals who hold different cultural traditions or customs than those of the mainstream society. Social tensions arise if different ethnic groups are vying for the same cultural spaces and opportunities. One example is the large number of people entering the United States across its southern border. Europe is experiencing a similar immigration issue, with immigrants from North Africa, the Middle East, and former colonies. Japan, on the other hand, has taken pride in holding on to its homogeneous Japanese culture but is facing the same employment situation.

Key Takeaways

1. The search for cheap labor and resources drives the need for profits by multinational corporations that fuel the global economy. This activity is creating a second major wave of globalization, often referred to as neocolonialism or corporate colonialism.
2. The concepts of opportunity and advantage provide a means to understand the attractiveness or unattractiveness of a place to invest in economic activities. Opportunities and advantages drive economic growth, migration, and movement of corporate activity.

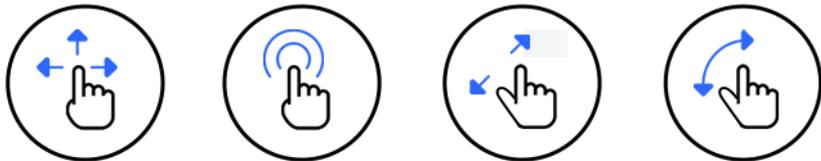

Real-Time Interactive Demonstration

The precise real-time annotation feature, with support for following screen movement and zooming, allows you to effortlessly mark important concepts and detailed explanations, aiding students in grasping course content more easily and maximizing presentation effectiveness.

Simplified Gesture Control

Easily and smoothly navigate your presentation with smooth control, whether it's using a mouse or swiping directly on the touchscreen of IFPs. Stay focused on teaching and interact seamlessly with students, free from distractions of complex operations.

Money: an algebraic problem

Read the problem and find the answer:

There was a group of friends who decided to plan a trip together. **They wanted to rent a car and split the cost equally among themselves.** However, one of the friends suggested that they should include an additional **\$50 fee for gas.** The group agreed, but soon they realized that they had forgotten to factor in the **10% tax** that they had to pay on the rental car. This made some of the friends uncomfortable, as they were not sure how much they would have to pay in total. The friends turned to their algebra skills to solve the problem. They knew that **the rental car would cost \$500 for a week,** and the gas fee was \$50. They needed to figure out how much each person would need to pay if they had to pay a **10% tax**

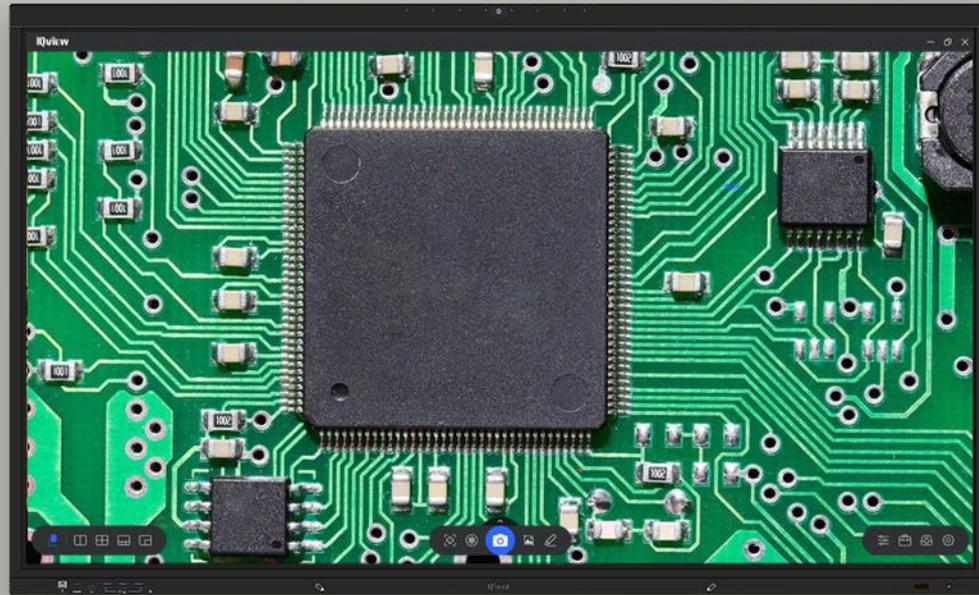

1. How much would **each person** have to pay without factoring in the tax?

2. How much is **the tax** they need to pay?

10x

Choose the correct

- What is **the slope of the line** that passes through the points (2,4) and (6,10)?
 1/2 2 1
- What is **the slope-intercept form** of the line that passes through the points (1,3) and (4,7)?
 $4/3x + 5/3$ $-4/3x + 11/3$ $4/3x - 5/3$
- Which of the following equations represents a line **perpendicular to the line $y = 2x + 1$** ?
 $-1/2x + 3$ $-2x + 5$ $1/2x + 3$

Dynamic 4K Presentations with 20X HD Zoom

With IQView E4521 document camera, the IQView software will showcase content in stunning 4K clarity and utilize its 20X HD zoom capabilities (10X optical zoom and 10X digital zoom), ensuring vivid and engaging teaching and presentations for various scenarios.

Side-by-Side Content Teaching

Under the camera, write and compare content while displaying other resources in split-screen mode. Connect two document cameras for simultaneous split-screen presentation, adjusting feeds independently. IQView supports all resources and split-screen features like zoom, rotation, and full-screen display.

Classroom Instruction

Improve teaching result by showing live whiteboard content alongside textbook examples in split-screen mode to illustrate concepts effectively.

Homework Grading

Efficiently grade assignments by comparing student papers with model answers side by side.

Experiment Demonstration

Improve student comprehension by comparing experiment procedures with theoretical knowledge in real time.

Boosted Lesson Tools

Improve lesson preparation with IQView's OCR function, experiment capture, QR code scanning, alignment assistance, and fixed header features, optimizing classroom engagement and workflow.

Smart Text Recognition

Utilize OCR to convert textbook content into editable text for easy lesson preparation and knowledge sharing.

Experiment Capture in Burst Mode

Capture photos at timed intervals to record object movements during experiments, facilitating analysis and review.

QR Code Scanning for Instant Access

Quickly scan QR codes in textbooks to directly access related video links, enriching classroom content and enhancing interactivity.

Alignment Assistance with Gridlines

Enable gridlines to aid in aligning visuals, ensuring accurate and clear presentations.

Fixed Header for Student Papers

Freeze student names at the top of the display when grading papers, allowing seamless navigation through content and improving grading efficiency.

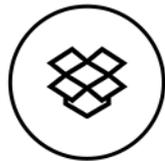

Teaching with Focus Tools

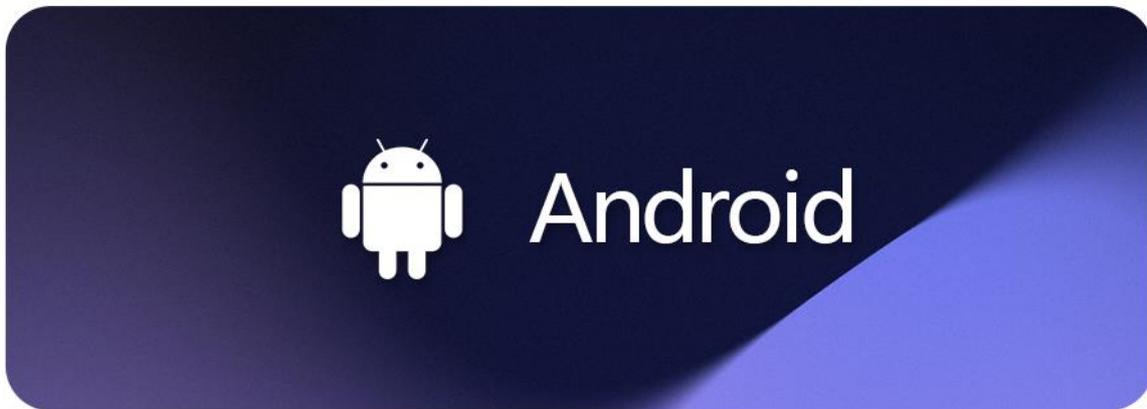

Spotlight, curtain, and magnifying tools enhance focus, protect privacy, and deepen understanding, vastly improving teaching and interaction.

Flexible Material Options

Streamline lesson preparation with IQView by importing all essential materials and annotating any resource effortlessly. Save annotations and teaching content to USB drives or cloud storage for easy portability and sharing across platforms.

The screenshot displays the IQView interface with a document open. A blue arrow labeled "import" points to a "Resources" window in the top right corner, which contains a plus sign and a document thumbnail. The main document shows physics text with mathematical formulas and handwritten annotations in red and purple. A purple circle highlights a section titled "§ 123. Work done by a Couple." Below the document, a "Select Save Location" dialog box is open, showing options for OneDrive, Google Drive (highlighted in blue), and Dropbox. A blue arrow labeled "save" points from the document to the Google Drive option in the dialog.

Dual-Platform Support

IQView software offers dual-platform support for Windows and Android, ensuring a perfect teaching experience whether on your personal computer or Android-based IFPs. You will have enhanced flexibility and freedom in both operating system and device choice for effortless teaching.

Perfect Pairing Teaching Solutions with IQView Document Cameras

Leave a lasting impact on the audience with our software alongside the IQView E4521 Interactive 4K Document Camera for vivid content display, and with the IQView Document Camera E6510 for flexible, high-resolution image capture. Together, these tools empower dynamic teaching experiences.

IQView Document Camera E4521

Be ready for a wonderful presentations with the IQView E4521, featuring 4K resolution and precise 10X optical zoom for stunning visual clarity.

IQView Document Camera E6510

Capture every detail effortlessly with the IQView E6510. Connect via USB for high-resolution image clarity in educational settings.
